

# Contents

<b>Preface</b>	v
<b>Chapter 1: Forward Price, No-arbitrage Pricing and Risk-neutrality</b>	
1.1. Forward Price	1
1.2. Risk-neutrality	2
1.3. Income providing assets	3
1.4. Value of a forward contract	6
<i>Summary of results</i>	7
<i>Problems</i>	8
<b>Chapter 2: Options and their properties</b>	
2.1. Options	11
2.2. Properties of options	13
2.3. Put-call parity	18
2.4. Trading strategies and spreads	19
2.5. A result on options on currencies	21
<i>Summary of results</i>	23
<i>Problems</i>	25
Appendix: The Black-Scholes formula	28
<b>Chapter 3: The Binomial model</b>	
3.1. Risk-neutral pricing with the binomial model	29
3.2. No-arbitrage Argument	30
3.3. Many periods	34
3.4. Using volatility	38
3.5. Risk-neutral probability and the real world probability	40
3.6. Options on forward contracts	42
3.7. Discrete Dividends	43
3.8. Other trees	44
<i>Summary of results</i>	46
<i>Problems</i>	47

## Chapter 4: Brownian Motion

4.1. Egbert Sousé overserved	54
4.2. The Itô process	62
4.3. Polynomial approximation and Itô's lemma	64
4.4. Correlated processes	70
4.5. Some problems from SOA/CAS samples	73
<i>Summary of results</i>	76
<i>Problems</i>	77

## Chapter 5: Black-Scholes Model and Options Pricing

5.1. The normal and lognormal Distributions	81
5.2. Lognormal model for stock price	82
5.3. The Black-Scholes equation	85
5.4. Application to specific options	88
5.5. Exotic options	93
<i>Summary of results</i>	98
<i>Problems</i>	101

## Chapter 6: Options Greeks

6.1. Variables that affect the option price	107
6.2. Expressions for the option Greeks	108
6.3. Delta hedging	109
6.4. Gamma hedging	110
6.5. Market-maker's profit from Delta hedging	112
6.6. Market-maker's profit from Gamma hedging	114
6.7. Option elasticity	115
6.7. Greeks in the binomial model	115
<i>Summary of results</i>	117
<i>Problems</i>	118

## Chapter 7: Interest Rate Models

7.1. Bonds and yields	121
7.2. Interest rate trees	122
7.3. The Black-Derman-Toy model	123
7.4. Options on bonds	125

7.5. Continuous models	126
7.6. Delta hedging	127
7.7. Equilibrium models	128
7.8. Black's model for options on bonds	131
7.9. Options on interest rates and caplets	131
<i>Summary of results</i>	134
<i>Problems</i>	136

## **Chapter 8: Simulation, volatility and Jensen's inequality**

8.1. Simulation	140
8.2 Examples	141
8.3. A Monte Carlo method	144
8.4. Measuring volatility	145
8.5. Jensen's inequality	146
<i>Summary of results</i>	148
<i>Problems</i>	149

## **Solutions to Problems**

Chapter 1	153
Chapter 2	155
Chapter 3	159
Chapter 4	166
Chapter 5	172
Chapter 6	177
Chapter 7	179
Chapter 8	184
